

Welcome to

Spectrum

To turn on the TV, first press the TV button on your remote control and then press the POWER button.

Then turn on the cable box by pressing the CABLE button (CBL) and then the POWER button again and wait a couple of seconds.

If you still don't see a picture on your TV after doing the above, check the remote of your TV and look for the 'input' or 'source' button. Change the input/source channel by pressing this button until you see a picture on the TV (on most TV's the correct input channel is HDMI 1 or CABLE BOX).

To turn on the TV, press the TV button.

To turn on the cable box, press the DTA button.

! Please, do NOT tamper with any settings !
